Singleton Sheet Metal Works
397 E. Industrial Blvd.
Pueblo West, CO 81007

Reference: Thermal Test Complex
Sandia National Laboratory

Subject: Letter of Appreciation

Attention: Michael Singleton

Mike:

We want to express our appreciation for the quality of your portion of the work on the Thermal Test Complex. Under very difficult circumstances of steel price increases and steel shortages, you were able to maintain and improve a tight owner and general contractor schedule. Sandia National Laboratory's welding inspector found no deficiencies in your welding and was, indeed, complimentary of your quality control and finished product. The quality of your fabrication allowed us to install the large duct efficiently with a minimum amount of field adjustments. We found your production team, drafting, fabrication, and shipping, to be helpful, cooperative and available. We enjoyed working with you and would highly recommend your company to anyone who needs large specialized ductwork fabricated.

Sincerely,

Patrick D. Gore
Project Manager
